***Reasons For Allowance***

1. Claims 2-4,6,9,12,13 and 18 have been allowed.

2. The following is an examiner's statement for allowance:

The prior art references most closely resembling the applicant's claimed invention are Yao et al (U.S. 5,938,734), Ueno et al (U.S. 6,438,596) and Kanazawa (U.S. 6,580,870).

First Yao disclosed realizing a supply of real-time stream data with different data rates by a scheduling scheme using constant time-slot interval and transfer start timing period. However Yao did not disclose, "wherein the distribution instruction comprises editing the content of the real-time reproducible stream information reducing a display size of the content, based upon the traffic volume on the network and/or the processing capacity of the receiving device " (claim 18).

Second Ueno disclosed, " communication-network-resources management control" failed to disclose "wherein the distribution instruction comprises editing the content of the real-time reproducible stream information reducing a display size of the content, based upon the traffic volume on the network and/or the processing capacity of the receiving device " (claim 18).

Third Kanazawa also failed to disclose, "wherein the distribution instruction comprises editing the content of the real-time reproducible stream information reducing a display size of the
